

# Rx Concierge

## CASE STUDY

Union group with  
14,000+ members

Over \$1 million saved in their first  
two years with Rx Concierge

Rx Concierge is a retrospective cost containment solution that provides risk-free savings with no member disruption. It seamlessly integrates on top of your existing pharmacy benefit structure with no changes to formulary needed. Rx Concierge catches savings opportunities that slip through the cracks, despite the other layers of defense you have in place.

Our pharmacists work directly with prescribers and let the prescribers work with their patients to determine what is right for them. Prescribers can choose to accept or decline our recommendations – and 75% of prescriber respondents accept. Prescription changes are tracked through detailed reporting, and you get to see exactly where your savings are coming from.

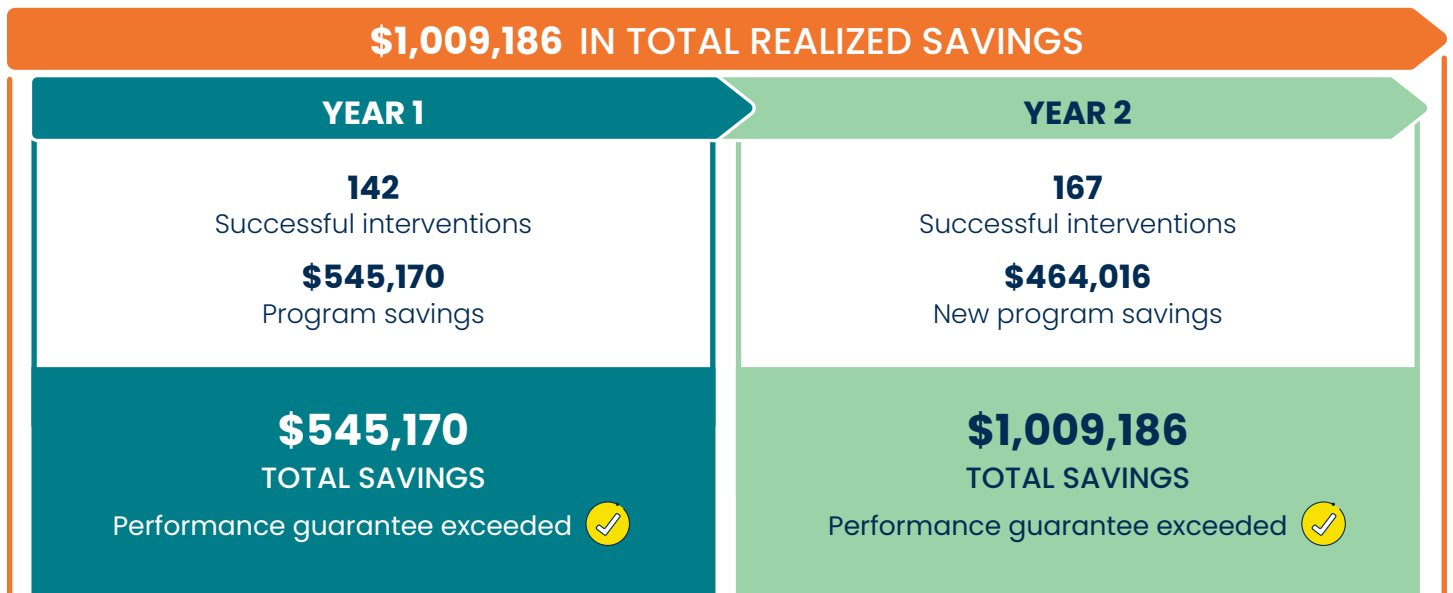

**\$2,864** in average annual savings  
per converted drug

**\$421,270** in total savings over  
group guarantee

# Significant savings in first two years

This union group with over 14,000 members has experienced savings exceeding their performance guarantees each year since starting the program.

## Proven results

**309**

Total successful interventions

**\$3,352**

Average savings per successful intervention

**\$3.00**

Average PMPM savings

When you choose Rx Concierge, you're choosing an efficient, cost-effective, clinically powered pharmacy spend solution.

**99% of groups achieve savings that exceed their guarantee.**
